

GOODBYE CLUMPY BUILDUP.

Sprays on quickly and easily.
No mess, no spatula and grease pail and no
gunky buildup on the fifth wheel.

YOU'VE GOT NOTHING TO LOSE BUT THE GUNKY MESS

Resists rain, snow and water washout.

Protects against friction, wear and corrosion.

Sprays on easily; stays in place.

Forms an adhesive film with a cushioning effect.

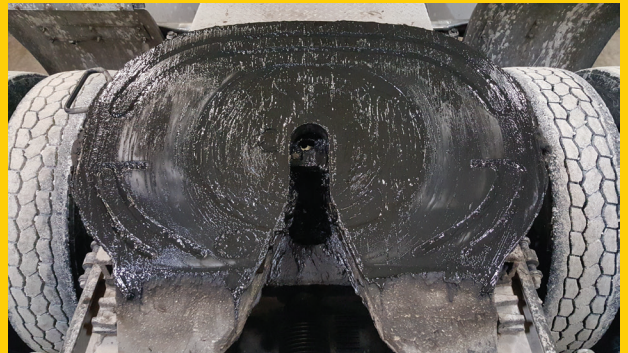

Doesn't harden, chip, flake off or build up.

Your fifth wheel deserves better than gunk

The top plate is vulnerable to frictional wear caused by constant contact with the trailer. Over greasing the fifth wheel attracts dirt and debris, which causes gunky and abrasive clumps to build up. That messy residue can increase wear and tear to the fifth wheel. Moly 5th Wheel Lube is a thin but durable lubricant that sprays on quickly and doesn't build up over time.

Fortified with molybdenum disulfide, Moly 5th Wheel Lube helps keep equipment in top condition, so all moving parts move freely for smoother operation. Through rain, snow and cold, Moly 5th Wheel Lube withstands tough driving conditions to keep fifth wheels protected. Solid protection. No mess.

"The product stays where it's supposed to and lasts longer than the grease we previously used. It doesn't lose its slickness, and it saves on wear and tear on the equipment."

~Protein Transport

For your fifth wheel, trust Moly 5th Wheel Lube.
